

**PLAKA - RAPID CLAMP WITH SPRING**

Rapid clamp for 5 to 10 mm bars  
REF 04.03.02 - Version V01 - 12/08/2020

**Description**

The rapid clamp with spring, consisting of an eccentric axis and an internal spring, allows formworks to be clamped on bars with a diameter of 5 to 10 mm.

The bearing plate has a dimension of 110 x 175 mm.

The teeth of the eccentric system block increasingly as the concrete pressure raises, and penetrate the thread to maintain the anchorage.

**Application**

Designed for bars from 5 to 10 mm.

**Dimensions**
